

Business Plan

1. Mission Statement

1.1 Our Purpose

The Rotherham Allotments Alliance provides, promotes and develops allotments in Rotherham to offer people of all backgrounds and abilities opportunities to enjoy gardening in safe, secure, accessible and environmentally sustainable surroundings. To do so, it makes efficient use of available resources to ensure that the service is financially self-sufficient whilst remaining affordable to those who want to use it. The Alliance operates as a Community Benefit Society which is registered as non-profit making with any surplus being retained by the Alliance, used for the benefit of its members.

It is doing this by:

- enabling allotment societies to flourish on sites where they already exist
- providing guidance and support to such societies where required
- managing sites which do not have societies efficiently
- promoting the establishment of new allotment societies on sites that do not currently have them and/or establishing a volunteer base for sites that are unable to form a society
- developing and implementing plans for the improvement and promotion of allotment gardening across the borough of Rotherham.

1.2 Why the Rotherham Allotments Alliance is needed.

Following the review conducted in 2018, the Rotherham Allotment Alliance was established to realise the potential of allotments through self-management, within available resources.

1.3 Rotherham Allotment Alliance Current Position.

The RAA has now been in full operation for 2 years. Unfortunately, the full legal transfer is still not completed. Frustratingly, this matter has now dragged on into 2022. Both sides' solicitors have been tasked with reaching a speedy conclusion to the situation. It is hoped that this will be resolved in early 2022.

The Alliance employs an administrator (seconded from RMBC) to deal with all administrative duties involved in managing the allotment sites under the Alliances control. The Allotment Support Assistant – Donna Bushby undertakes plot lettings, rent collection and organises site maintenance and emergency works. The Allotment Support Assistant is also involved in financial processes such as invoice payments and budget setting.

The continuation of the covid pandemic has carried on the difficulties with curtailing and restricting access to members by way of meetings and site inspections, However, these were able to resume to a certain extent with a relaxation of the rules. Board meetings have continued to be held by zoom but it is hoped that face to face meetings will become more regular in the form a monthly board meeting. Sub-committee meetings and other meetings will still be held by Zoom where necessary.

The RAA is still offering incentives by the way of free rental fees for 1 year for new tenants to clear overgrown plots themselves. The number of overgrown plots has now reduced due to this. Other works that have taken place on sites include building repairs, plumbing repairs and waste removal.

The Alliance has also created a partnership with Community Payback who are currently on the Rectory Field site clearing unused plots. There is potential for this service to be utilized on other sites which is a valuable asset as it

2. Services

2.1 What we do

The principal business of the Rotherham Allotments Alliance will be is to sustain and improve allotment sites and services previously provided by the Council. The main elements of these services are as follows:

Routine allotment management and maintenance

- Letting of allotment plots on directly managed sites, including management of waiting lists, plot preparation and collection of rents.
- Temporary letting of unused allotment land for other compatible uses, including grazing.
- Maintenance and improvement of directly-managed sites, including grass, hedges, trees, boundaries, gates, water supplies, communal buildings,
- Preparation of vacant plots
- Letting of allotment sites to allotment societies and/or establishing a volunteer base

Service development

- Developing networks to support existing allotment societies
- Encouraging and supporting formation of new societies on sites without self-management
- General promotion and development of allotment gardening across Rotherham

2.2 The Value of Our Services

Allotments are unique in that they provide ordinary people with opportunities to enjoy open-air recreation, physical activity, food production, contact with nature, social interaction, practical skills development and volunteering at an affordable price and close to home. Rotherham Allotments Alliance will add further value to this resource by giving allotment gardeners and other supporters a real say in how services are developed, and by harnessing their knowledge and enthusiasm to extend the benefits of allotments within the local community.

2.3 Scale

The capacity of the Alliance to deliver these services is largely dependent on the amount of land available for allotment gardening. Current provision (updated in 2022 by the RAA) allows it to offer up to 367 allotment plots covering a total of 12.10 hectares on 10 directly managed sites, and a further 831 plots managed by societies on 15 sites covering 28.69 hectares. Plus, an additional 2.46 hectares of grazing land. However, in practice, this capacity is reduced by past failure to maintain vacant plots in a condition that makes them suitable for letting. Some areas of land are also no longer useable as allotments for reasons such as flooding. Furthermore, it may be possible to increase the number of opportunities for individuals to participate by subdividing large plots into smaller areas. In the longer term, it may also be possible to develop additional plots on 4 statutory allotment sites, totaling 3.7 hectares, that are currently uncultivated, and to bring other allotment sites, currently administered by others, into the Alliance.

2.4 Ensuring Quality

The continued success and viability of this business will depend on the Alliance's ability to assure the continuing quality of the services offered. For this reason, the Alliance will develop and implement a performance framework in association with site societies, that will include, for example:

- expenditure
- income
- · member satisfaction

- proportion of land under cultivation and let
- waiting lists
- complaints from members

It will monitor this information to identify trends, set targets, address areas of weakness and drive service improvement.

The Alliance will also take steps to ensure its services remain relevant and up-to-date. For example, it will undertake periodic review of best practice elsewhere in allotment service provision. As a member of the National Allotment Society the Alliance will actively engage in networking and information sharing to support this. It will also review feedback from members to identify their priorities for development. This will be collected in the form of an online-survey.

3. Social Impact

3.1 The Local Community

The Rotherham Allotments Alliance will serves people living in and around Rotherham. The area comprises the urban centre of Rotherham and a number of smaller settlements and countryside surrounding it. Approximately 75% of the land area of Rotherham borough is rural. The latest mid-year estimate of Rotherham's population is 265,411 as at April 21. (www.rotherham.gov.uk/data/people/population/1)

The growth of Rotherham's urban areas during the 19th and 20th centuries was driven largely by industrial development, particularly coal, iron and steel. These traditional industries have declined greatly over the past thirty years, with negative impacts on the local community. Rotherham is currently the 51st most deprived district in England (in most deprived 16% nationally). The key drivers of deprivation in Rotherham are:

- Health and Disability (21% of population in English top 10%),
- Education and Skills (24% of population in English top 10%) and
- Employment (24% of population in English top 10%).

(Rotherham Joint Strategic Needs Assessment, Rotherham Demographic Profile 2016-17.)

3.2 The Role of Rotherham Allotments Alliance

Rotherham Allotments Alliance can help to address needs arising from local deprivation by making better use of allotments to provide opportunities for people to be more physically active, reducing isolation, developing skills and building personal confidence. This has been especially important since the pandemic and also with current rising living costs.

Currently there are 1198 plots on Council-owned allotment sites. In February 2018, there were 1107 plots on Council-owned allotment sites. 9% of these plots were not in use, including 5% that were unlettable. At the same time, there were 150 people waiting for an allotment plot. Currently, there are 54 people on waitlists for direct-managed sites and 103 on society-managed sites. The aim is to increase the number and range of people involved in allotment gardening and associated activities, for example by:

- Re-instating disused plots to make them suitable for letting
- Improving access, welfare and other facilities to make sites more attractive to a wider range of users
- Promoting allotment gardening more effectively, and introducing more effective procedures for plot letting
- Enforcing cultivation standards more rigorously to ensure efficient use of available plots

- Supporting existing allotment societies, and the development of new societies
- Working in partnership with other bodies to engage with the wider community through events, volunteering opportunities, education and training etc.

Not only would the number and diversity of people benefitting from allotment gardening and associated activities increase, but the condition of allotment sites would improve also, with associated visual amenity, environmental and horticultural benefits.

3.3 Measuring Social Impact

Delivery of benefits of allotment gardening to the local community is dependent on availability of plots, and the number of people engaging in the activity. So that the Rotherham Allotments Alliance can monitor and report on its performance in this regard, it will use the following primary measures:

- Total number of plots
- % of plots cultivated and let
- Number of members
- Number of people on waiting lists

As a large proportion of plots are on sites managed by societies, then the Alliance will work with those societies to incorporate data from their sites into the above measures. The Alliance will also be able to develop secondary measures as necessary to monitor performance of specific activities and projects. These could include environmental measures, for example, total length of hedge within allotment sites.

4. Our Customers and Stakeholders

4.1 Allotment Plot-holders

This group is of fundamental importance to the business of the Rotherham Allotments Alliance. Allotment Plot-holders are the main customers of the service, and income from rent they pay is essential for continuing service provision. On directly-managed sites, such people will pay rent directly to the Alliance who will be responsible for managing all aspects of the service they receive. On society-managed sites, plot-holders will pay rent to the society, who will then pay a rent to the Alliance. In these cases, plot-holders will benefit from certain services provided by the Alliance, as well as other support provided by the Alliance to their society as required.

Total rent income from directly-managed and society sites is expected to be sufficient to cover the cost of service delivery because the Council have been managing allotments on this basis prior to their transfer to the Alliance. Furthermore, it is expected that the Alliance will achieve efficiency savings through alternative procurement arrangements and use of volunteers.

Plot-holders will also constitute the overwhelming majority of the membership of the Alliance, and therefore be able to influence key decisions taken by it. It is also expected that most volunteers, including directors, will be drawn from this group.

The Alliance will engage with plot-holders directly through its website, correspondence and general meetings where members will be able to vote on important issues. By volunteering to become involved in the running of the Alliance, or to help with specific projects, plot-holders will be able to engage more actively.

4.2 Other Members

Membership will not be restricted to plot-holders. Anyone who supports the aims of the Rotherham Allotments Alliance may become a member. This might include former allotment gardeners, people on waiting lists, and representatives of other local community bodies.

The Alliance will engage with supporter members in the same ways as with plot-holders. An annual subscription of £3.00 will be payable to maintain membership. As supporter members, subscriptions will need to be paid by them annually.

4.3 Site Allotment Societies

Societies are also very important stakeholders. They are relied upon by their members for day-to-day site management. Indeed, the proven effectiveness of such local management, as identified through a user survey in 2017, has been a major driver leading to the establishment of the Alliance. The Alliance will also need the support of Societies in membership administration, for example maintenance of member names and contact details, and collection of performance data.

One of the principle aims of the Alliance is to maintain an environment where site societies can flourish. It will do this by:

- Continuing to provide services and other support to societies where this is more practical or costeffective than the society doing things itself
- Providing specialist advice, either directly or through partnerships with other organisations
- Facilitating and encouraging mutual support networks amongst different societies
- Promoting allotments generally to help maintain demand for plot rentals
- Engaging with societies, by correspondence or meetings, to ensure their interests are taken into account when making decisions
- Encouraging society representatives to stand for election as directors of the Alliance
- Ensuring lease terms and conditions, and rents are fair and reasonable.

4.4 Rotherham Borough Council

Whilst the Council has chosen to be less directly involved in the management of its allotments, it will still have a significant interest in the work of the Alliance. This will include the following:

- Continued delivery of allotments on Council land in line with requirements of the Allotment Acts
- Sustainability of self-management arrangements
- Proper conduct of the Alliance, in the best interests of plot-holders and the local community generally
- Ensuring a dynamic and engaged allotment community in Rotherham Metropolitan Borough Council
- For allotments in Rotherham to be recognised nationally as a beacon of good practice.

The Council will be closely engaged in the strategic management of the Alliance by nominating two elected members to act as its representatives on the board of directors.

4.5 Related Associations

The Alliance will work with any bodies associated with allotment gardening, either on a local or national Level, i.e. National Allotment Society and RaDAA.

4.6 Other Allotment Providers

Allotments in some areas of Rotherham are provided by Parish Councils rather than Rotherham Borough Council. Such providers are expected to be interested in the same things as RaDAA (see above). Furthermore, they may be interested in future opportunities for control of their sites to be taken on by the Alliance.

Other allotment providers will not have any automatic role in the governance of the Alliance. However, it is envisaged that they may work in partnership with the Alliance, for example to promote allotment gardening to a wider audience, or to share resources.

4.7 Wider Community

The wider community in Rotherham and the surrounding area will have an interest in the successful management of allotments so they do not become a nuisance to neighbouring areas, but rather that allotments and allotment gardeners make a positive contribution to quality of life for the wider local community.

The wider community will not have any automatic role in the governance of the Alliance. However, individuals who support the aims of the Alliance may apply to become members.

5. Marketing Plan

5.1 Market Segments

5.1.1 Time-rich

This group includes people who are retired, unemployed, working part-time or who have few other commitments. Currently a large proportion of plot-holders are from this segment, reflecting the fact that allotment gardening is a great way of staying fit and active when otherwise one might become sedentary and under-occupied.

5.1.2 Time-poor

Many people in full-time employment or education, bringing up children, or caring for elderly or disabled relatives, can struggle to find time to do things they enjoy and to find relief from the stresses of everyday life. Results of the 2017 allotment user survey appear to confirm this, with just 10% of respondents being younger than 40, 37% being between 40 and 59, and 53% being 60 or older. This group can stand to benefit hugely from an activity like allotment gardening, but marketing to them must consider the difficulties they face in making a commitment.

5.1.3 People who might feel excluded

Analysis of the 2017 user survey gives some insight into groups who might currently feel unable or unwilling to get involved in allotment gardening. For example, only 24% of respondents were female, compared to 50.8% in the general population. 5% were from a BEM community, compared to 8.1% in the general population. However, the number of respondents who stated they had a disability was relatively high, at 27%. The proportion of people in the general population with a limiting long-term illness is 21.9%.

One of the agreed aims of the Alliance is to widen participation in allotment gardening. The above figures suggest that marketing effort may need to be focused on females and people from BEM communities, but the Alliance will also seek to identify and address the needs of others who feel excluded because of physical, intellectual or cultural barriers.

5.2 Competition

Allotments are generally provided as a public service by statutory allotment authorities covering specific geographical areas. Thus, there is very limited competition in the allotments market itself. However, allotments do have to compete for people's leisure time and spending against other activities including a wide range of sports and hobbies, home entertainment, socialising and travel.

Some competitors benefit from large marketing budgets, not readily available to allotment providers. Others may appear attractive because they do not involve making a significant long-term time commitment, or because they can be accessed without having to leave the home.

However, allotment gardening has a number of competitive advantages which, in combination, represent a unique selling point. These include the ability to produce something of value, freedom to start and finish at times to suit individual needs and preferences, ability to work either independently or collaboratively, physical activity, spending time outside, escape from the built environment and stressed of everyday life, low cost, learning and skills development, and pride in the fruits of one's efforts.

5.3 Marketing Methods

5.3.1 Research

Whilst possible marketing techniques have already been identified, as discussed below, the Alliance will seek to improve its understanding of the effectiveness of different methods to reach different market segments. Such research can include:

- Surveys of non-users (e.g. at events, or on-line) to find out why they don't have an allotment, and what would encourage them to start.
- Asking new users why they decided to start allotment gardening
- Networking with other providers and national organisations to identify what has worked well elsewhere
- Exploring innovative techniques used by other types of business.

It will also monitor the effectiveness of different marketing methods, listed below, by recording numbers of enquiries generated, number of new starters, retention rates after 3 months, 6 months and 1 year, and costs.

5.3.2 Working with Site Societies

The Alliance sees it as being able to spearhead efforts to improve public awareness of, and enthusiasm for allotment gardening. However, it is clear that to be as effective as possible it must work closely with individual site societies to deliver a joined-up message and to add value to each other's marketing activity. Therefore, it will be keen to pursue the following methods not only by itself, but also in partnership with site societies.

To foster a closer working relationship and partnership with Allotment Societies who administer their allotment sites directly, the RAA intends to introduce annual meetings specifically aimed for attendance by Allotment Society representatives. The RAA AGM (usually held in late March) will give the opportunity for discussion and agenda setting for two further meetings to be held in months 7 and 11 each year. The agreed agendas will be the basis of discussion to further the improvements of allotment provision within the remit of the RAA to meet both the individual Allotment Societies and RAA aims and objectives.

5.3.3 Website

The Alliance's website will is not only where members can go for information and communication, but it will also acts as a shop window for people who may be looking for a new leisure activity. The web-address will be shown widely on other materials produced by the Alliance to ensure maximum exposure. Development of the website will include offering the information in different languages to attract members from ethnic minorities.

5.3.4 Social Media

The potential of channels such as Facebook, Instagram and Twitter are recognised as offering cost-effective ways of reaching a wide audience. Of particular value is the fact that they can be used to target under-represented groups, including younger people and females, as well as specific geographical areas. They are also very flexible, allowing new material to be posted quickly to respond to situations where interest in allotments may be increased, for example by news stories and other media coverage.

5.3.5 Site Notices

The Alliance will be able to capitalise from its extensive physical presence within many of Rotherham's communities. Notices posted at the entrance to allotment sites can be used to advertise the availability of plots, forthcoming events, and schemes to encourage people to try out allotment gardening (see below). Direct-managed sites will benefit from having dedicated notice boards installed at the site entrance to show information for both current and prospective tenants.

5.3.6 Events

The annual Rotherham Show, well-known locally for its display of produce from allotments, attracts thousands of visitors. It therefore offers a unique opportunity to reach a diverse audience with a large proportion on people who may already have an interest in horticulture. In 2021, the Alliance had a high-profile presence at the show in the horticulture tenant with a stall to promote allotment gardening generally and advise on sites that were available. The seed 'giveaway' and children's 'guess the plant' competition were a positive marketing activity which will be repeated in 2022.

5.3.7 Partnerships

The Alliance understands that some under-represented groups may be hard to reach due to cultural or intellectual barriers. It will therefore look to work with partners who have an existing profile within such communities, to communicate the opportunities offered by allotments in ways that are appropriate to the audiences in question. Such partnerships may also deliver solutions to overcome physical barriers where necessary, for example by providing specialist transport.

5.3.8 Special Schemes and Offers

As explained in section 5.1.2 above, it is likely that some people do not take on an allotment plot because they feel unable to commit sufficient time or energy to make it a success. The Alliance will explore the possibility of introducing introductory schemes and offers such as:

- Mini-plots (these could also be offered on a longer-term basis)
- Mentors
- Starter groups with shared plots.
- Social events
- Adapted plots for universal access

- Community lettings. 2021 has seen a number of community groups been established on some sites and the RAA will help to promote these plots to volunteers.
- Rental discounts for new starters, when taking on a previously un-cultivated area, to allow plot to be brought into cultivation.

6. Production and Process

6.1 Process by which inputs become outputs

The processes to be operated by the Alliance can be categorised as follows.

6.1.1 Routine allotment management and maintenance

As startedwith pre-existing Council budgets and processes as a model, the Alliancesets service standards and deploys resources as necessary to deliver routine operations across directly-managed sites to achieve these standards. In doing so, it monitors performance, reviews standards and explores alternative delivery options to achieve continuous improvement in service quality and value for money.

a) Plot letting, tenancy administration and management of waiting lists (directly managed sites only)

The Alliance will continue to utilise the Colony computer application, which has previously been used by the Council for all tenancy administration functions. The Allotment Support Assistant is responsible for all of the administrative tasks associated with allotment lettings, i.e. issuing invoices, tenancy agreements and keys via both telephone and email.

b) Administration of society tenancies

It is expected that this will be undertaken using the same method as that adopted for administration of individual tenancies on directly-managed sites. By utilising the Colony computer application, the Alliance will offer administrative assistance to site societies, including maintenance of tenancy records, waiting lists and rule compliance.

c) Site maintenance

This work includes maintenance of boundaries, trackways, communal areas and buildings, water supplies and vacant plots, as well as waste collection and pest control.

Previously, the Council has used a variety of methods to deliver this work. For example, general site maintenance has been done at times by a dedicated staff members, and at other times by agency staff. Waste collection has involved commercial hire of skips, and pest control has been undertaken by contractors. The Alliance will assess cost-effectiveness of these and any other options for delivering site maintenance, including volunteering, before selecting preferred methods. All such operations will be subject to continuous review, and varied as necessary to ensure good value for money. Review of all services provided is still ongoing to determine the best course of action.

As well as delivering such services on its directly-managed sites, the Alliance will continue to provide selected services on behalf of societies on their sites, as the Council did. It will jointly monitor the effectiveness and value of such services with societies, and jointly review whether to increase or reduce the range of services provided to them. A survey was conducted with societies to ask what services they were willing to undertake themselves. The results were very mixed so it was decided that maintenance such as grass and hedge cutting and pest control (where RMBC had provided provision) would continue to be offered to ensure a standardized and reliable offering to each site.

6.1.2 Service development

The Directors will be responsible for reviewing performance information, member feedback and best practice guidance to identify service development priorities. They will also lead on service development planning, including resourcing strategies. However, they will seek advice and guidance, wherever possible at zero or minimum cost, from national and local organisations, including Co-operatives UK and the National Allotments Society.

External grants will be sought for major project development and delivery, again with the support of partners where possible. Small-scale projects and those with limited financial implications may be managed and delivered by Directors and other volunteers, subject to robust assessment of risks. Such projects might include development of mutual support networks, equipment purchase, small-scale events, and development of new societies on sites that do not currently have them.

6.1.3 Advocacy, Fund-Raising, Promotion and External Communication

The Alliance aims to raise the profile of Rotherham's allotments to help sustain and increase demand, to support fund-raising efforts, and to build confidence in the allotments movement both locally and nationally. Such efforts will be led by Directors who may create specialist teams of volunteers to deliver more focused work in this area. Where funds allow, consultancy support may also be used.

6.1.4 Membership Services

All members of the Alliance, regardless of whether they rent an allotment plot or not, are entitled to view the following documents. These can be found on the RAA website (rotherhamallotments.org.uk) or hard copies can be posted on request.

- A copy of the annual report and accounts
- A copy of the rules of the Alliance
- Minutes from board and sub-committee meetings
- An invitation to attend the Annual General Meeting, and any other general meetings called by the Alliance
- Vote in elections to appoint board members, and to vote on resolutions presented at general meetings (may include postal ballots)
- Stand for election as a board member
- A share certificate, and/or a statement of their share account

Additionally, the Alliance will make news and information about its activities available to all members and enable them to:

- Support the society as a volunteer, campaigner or provider of expertise
- Express their opinions about the society's policies and future plans
- · Participate in the affairs of the society and learn how to become more actively involved
- Recommend the society to other people in the community.

The Alliance proposes to manage these membership services using the same systems it selects for tenancy administration (see section 6.1.1 (a) above).

6.2 Inputs

6.2.1 Income from Rents

Under Council provision, corporate billing and banking systems were used. The Alliance will continue to post invoices to individual tenant's home addresses to ensure that all bills are received directly. Being sent electronically would be more cost effective but not ideal as not all tenants have access to email plus there is scope for invoices to be missed. The logistics of sending individual invoices by email would be time-consuming. Payment methods offered are via online banking / bank transfer, cheque sent in the post or payment at a bank or Post Office. Tenants wishing to pay at the Post Office will need one of the RAA's paying in slips which is provided on request. Postal payments are sent to the PO Box and collected weekly by the Allotment Support Assistant / treasurer, who then logs payments and pays them into the bank/Post Office.

Any late payments are chased by the ASA who records any correspondence and issues any terminations where necessary.

6.2.2 Income from Share Purchase and Subscriptions

All members will be required to purchase a share for £1. Supporter/Associate members do not pay rent, and therefore share and subscription payments will need to be collected from them separately, using the same resources and systems that will be used for rent collection.

6.3 Finance

In order to comply with legal requirements and in the interests of proper and efficient financial management, the Alliance will have to have systems in place for the following:

- Accounts preparation
- Payroll (if employing people)
- VAT advice, if necessary
- Book-keeping s
- Reporting account's report under requirements the Co-operative and Community Benefit Societies Act 2014 Section 85, or audit, as necessary
- Insurance

Normally, The Treasurer, with the assistance of the ASA, will produce monthly statements, and also the annual statement to present to the Board. Currently, the Treasurer's position is vacant due to the passing away of Al Dean in 2021 and the resignation of Alison Howard who replaced Al. Lay Auditor(s) will also be appointed to audit the annual accounts using Quickbooks. However, in 2021, the board appointed a community auditor to produce the financial report due to the difficulty in recruiting a lay auditor. Currently the Allotment Support Assistant is undertaking all financial activities, under the supervision of the finance sub-committee.

The Council's insurance section has recommended that the Alliance procures both Public Liability and, if it employees staff, Employer's Liability cover to the value of no less than £5m. In addition, if it intends to operate any vehicles it will also need to arrange motor insurance to cover them. As a member of the National Allotments Society, the Alliance will be able to utilise its Public Liability Insurance Scheme. The Alliance has sought insurance provision and will implement once the signing of the lease has been completed.

6.4 Quality Assurance

As described in section 2.4, the Alliance will implement quality assurance systems to maintain efficient use of resources, customer satisfaction and continuous service improvement, all of which are important to Revision 4, Adopted by the Board 28.2.22, Min. no. 41/02/22b

the long-term viability of the Alliance.

6.5 Reporting to Members and Stakeholders

The Alliance will share information with its members and other stakeholders to ensure transparency and accountability. This will include annual reporting of accounts (as required by law), results of customer satisfaction surveys, complaints monitoring data, membership statistics, allotment occupancy rates and waiting list numbers. Such information will be posted on the Alliance website and reported at AGMs in the form of an annual report.

7. Premises and Equipment

7.1 Premises

7.1.1 Allotment Land

The allotment sites the Alliance requires to deliver the service have been in existence for many years prior to its establishment, and will be leased to the Alliance by Rotherham Borough Council. Societies will be granted a sublease on their sites by the Alliance.

A comprehensive audit of allotment sites was undertaken from 2017 to 2018. This recorded sizes, numbers of plots, facilities and condition. A summary of this information is given in the table below.

	Direct 1	Direct Managed		Total	
	active	inactive	1		
Size and occupancy					
number of sites	13	4	13	30	
total area (sq metres)	167750	37004	255604	460358	
% area cultivatable	74.3%	0.0%	68.2%	64.9%	
number of plots	515	0	592	1107	
Total number of plots	515	0	592	1107	
% plots let	77.5%	n/a	92.7%	85.6%	
% plots unlettable	11.3%	n/a	1.4%	6.0%	
% plots vacant	11.3%	n/a	5.9%	8.4%	
Number on waiting lists	66	n/a	53	119	
No. waiting where plot vacant	20	n/a	5	25	
Boundaries					
Total length boundary (m)	6927	2172	8795	17894	
% boundary fence not present	19.4%	31.0%	22.0%	22.1%	
% boundary fence mostly/poor	21.0%	32.8%	20.2%	22.1%	
% boundary fence mostly/good	59.5%	36.2%	57.7%	55.8%	
Total number of gates	29	2	35	66	
Number of gates mostly/poor	6	0	4	10	
Number of gates mostly/good	23	2	31	56	
Tracks and Car Parking					
Total length tracks and paths (m)	4127	0	6603	10730	
% tracks and paths mostly/poor	44.3%	n/a	25.9%	33.0%	
% tracks and paths mostly/good	55.7%	n/a	74.1%	67.0%	
Total number of parking spaces	36	0	57	93	
Plots per parking space	14.3	n/a	10.4	11.9	
Buildings					
Total number of buildings	21	0	147	168	
Plots per building	24.5	n/a	4.0	6.6	
number of buildings mostly/poor	3	0	9	12	

number of buildings mostly/good	18	0	138	156
Utilities				
% sites with water supply	61.5%	0.0%	76.9%	60.0%
% sites with electricity supply	0.0%	0.0%	46.2%	20.0%
number of water taps	61	0	30	91
plots per water tap	8.4	n/a	19.7	12.2
number of water troughs	4	0	42	46
plots per water trough	128.8	n/a	14.1	24.1

7.1.2 Offices and Meeting Space

In order to minimise costs, the Alliance will not rent or buy permanent office or meeting space. It is required to have a registered office address in order to register as a charitable community benefit society. This is currently 46 Celandine Rise Swinton, Mexborough, S64 8PL. The Allotment Support Assistant is employed on a work-from-home basis so most routine administration work is undertaken from a domestic premises, although some societies have indoor space within their sites that could also be made available for this purpose. Meetings will be held either in society buildings, or in space provided by the Council.

7.2 Equipment

7.2.1 Tools and Vehicles

The Council has previously purchased the following equipment to meet the operational needs of its own member of staff who has been responsible for site maintenance:

- Strimmer
- Leaf-blower
- Hedge cutter
- Bag of hand tools

Agreement will be sought to transfer this equipment to the Alliance when convenient, subject to checks that they remain fit for use.

The Council has leased a vehicle for use by its allotment operative. The Alliance will consider vehicle requirements into account when assessing options for delivering site maintenance works.

7.2.3 ICT

The Alliance ASA operates using a laptop with Microsoft 365 subscription, colour laser printer and laminator. Stationary supplies such as paper, envelopes, pens, stapler and staples, laminator pouches, plastic wallets, postage stamps, address stamps have been purchased. The Alliance also has a mobile phone contract with a Samsung smartphone which is a dedicated number. Additionally, the following specialist applications are being utilised:

Accounting and book-keeping software. 'QuickBooks' has been recommended by accountants who

- have offered to support the Alliance with financial accounting.
- Allotment management database. The Council previously used 'Colony'. The Alliance has now taken over the license of the software from RMBC and continues to use this system for all the allotment data management.

8. People

8.1 Founder Members and Directors

The establishment of the Alliance was being steered by a group of volunteers from the allotment community, Rotherham Borough Council's Cabinet Member for Waste, Roads and Community Safety, who has overall responsibility for Council allotments, and one other elected member of the Council. This group of Founder Members are now acting as Directors. Support was being provided by Rotherham Borough Council during the establishment of the Alliance and subsequent transfer of management responsibility for sites and services to it. The appointment of a part-time Allotment Support Administrator has taken place who is now responsible for all the administration of the Alliance, reporting to the Board of Directors.

Short profiles of the Directors are given below, in alphabetical order of surname.

8.1.1-Alice Parry

Board Member Chair and plot holder on South Street site

8.1.2 Mick Hirst

Role in Alliance: Board Member Plot holder on Avenue Rd allotments.

8.1.3 Councillor David Sheppard

Role in Alliance: RMBC appointed Cabinet Member for Social Inclusion.

8.1.4 John Palmer

Role in Alliance: Vice Chair

Plot holder on Barnsley Rd allotment site. Former Allotment Officer.

8.1.5 Brian Steele

Role in Alliance: Chair

Plot holder on a non-RAA site.

8.1.6 Mohammed Suleman

Role in Alliance: Board Member Plot holder on Clifton allotment site.

8.1.7 Jack Taylor

Role in Alliance: Secretary

Secretary and plot-holder on Wood St Site

8.2 Skills Gaps and how they will be filled

e.g. training, recruitment, co-option, use of consultants etc. All Directors had previously been asked to complete a 'skills gap' questionnaire. This is now under review and directors will be asked to complete.

9. Organisational Structure

9.1 Rotherham Allotments Alliance

The Alliance is a Community Benefit Society established by the Council in partnership with representatives of allotment societies and individual allotment gardeners to take over the management and development of Council-owned allotments in Rotherham. It will be run by and for its members. All individuals who rent a plot on an allotment managed by the Alliance, or leased by the Alliance to a society, will automatically become plot-holder members. Membership is not restricted to these allotment gardeners, as others will be able to join as 'supporter/associate members'. All members will purchase a share that entitles them to vote at general meetings of the Alliance. A further condition of membership is that people pay an annual subscription. Plot-holder members will have these payments deducted from their rent, and will therefore have nothing extra to pay.

A Board of Directors will be responsible for management of the Alliance on behalf of the general membership. This will be a 'Stakeholder Board' comprising up to 7 Directors elected by members, 2 Directors nominated by Rotherham Borough Council, and up to 2 other temporary Directors with particular skills or experience, co-opted by the Board as required.

The Alliance may choose to employ staff, contractors and consultants as necessary for the efficient delivery of its services.

The functions and responsibilities of the Alliance are as follows:

9.1.1 Governance

- Development and implementation of its own rules and regulations
- Setting service standards and monitoring systems including KPIs
- First line step-in/rescue in case of failing Society
- Secretarial support and record-keeping for Alliance business

9.1.2 Provision of Allotment Land

- Sub-let allotment sites to Allotment Societies
- Monitor demand for allotments across borough, including data supplied by Societies
- Make recommendations to RMBC for acquisition/disposal of allotment land
- Consider requests from Societies to surrender all or part of their leased land, and support them in finding alternative uses (e.g. grazing)
- Help RMBC in applying for permission to dispose of surplus allotment land, including statutory consultation.

9.1.3 Finance, insurance and staffing

- Employ staff as required
- Set annual budget for Alliance business (incl staff costs)
- Calculate and collect rent payments from tenants on directly-managed sites and Societies
- Monitor own budget and report to members regularly
- Take out insurance cover as necessary for Alliance business
- Give members an opportunity to join National Allotment Societies to benefit from insurance cover

9.1.4 Site Improvement and Maintenance

- Deploy resources to help Societies with maintenance and improvement projects, and to arrange the following:
- O Regular safety inspections of trees across all sites, and arrange works as needed Revision 4, Adopted by the Board 28.2.22, Min. no. 41/02/22b

- Deal with invasive species, flooding and hazardous waste reported by Societies
- Lead or support procurement for Societies of skips, pest control etc.
- Consider Society site improvement proposals, and decide whether to support
- Identify and share information about other external grant funding opportunities

9.1.5 Tenancy Management

- Sub-let allotment sites to Allotment Societies
- On directly-managed sites:
 - Provide information about how to rent a plot and plot availability
 - Manage waiting lists
 - o Prepare vacant plots for letting
 - Issue tenancy agreements
 - Collect rents and other payments (e.g. water)
 - o Take action to address under-payment, including possible termination of tenancy
 - Agree and issue site rules
 - Take action to address non-compliance, including enforcement and possible termination of tenancy
 - Respond to general enquiries from tenants
 - O Take action to try to resolve disputes between tenants
 - Respond to complaints from tenants and others

9.1.6 Service Development and Promotion

- Champion all allotments, and provide a unified voice on matters of general interest
- Develop and implement borough-wide communications to promote the benefits of allotment gardening, including Alliance website
- Help Societies by encouraging new volunteers to strengthen sustainability and representativeness of committees.
- Work with partners to reach under-represented and disadvantaged groups
- · Share/promote good practice guidelines from national bodies and between Societies
- Encourage neighbouring Societies to form clusters for mutual support and resource sharing
- Arrange and promote skills development opportunities for volunteers in all Societies (e.g. training, mentoring)

9.2 Alliance Management Functions

Function	Who or How?
Chair	Brian Steele
Society Secretary	Jack Taylor
Treasurer	

9.3 Rotherham Borough Council

The Council will retain its statutory duty to provide land for allotments. It will therefore be the ultimate landlord for this land. However, its role will not be restricted to being a higher authority, but instead it will participate in the governance of the Alliance through its nomination of two Directors to its Board. The functions and responsibilities of the Council are as follows:

9.3.1 Governance

- Nomination of Council reps to Allotments Alliance
- Ultimate responsibility for allotments service standards and legal compliance
- Ultimate step-in/rescue powers if self-management body failing

9.3.2 Provision of allotment land

- Lease all Council allotment land to Allotments Alliance.
- Consider requests to provide new land, or to take back surplus land from Alliance
- Acquire or appropriate land for new allotments as required
- Manage any surplus land surrendered by Alliance, noting that grazing income may need to be passed back to Alliance to support their activities
- Apply to Secretary of State for permission to dispose of surplus allotment land

9.3.3 Finance, insurance and staffing

.

- Manage capital reserves from sale of allotment land in accordance with Allotments Acts
- Allocate capital funding to support site improvement projects or to acquire new land for allotments
- Receive reports from Alliance on use of capital funding, including achievement of agreed outcomes, leverage of match funding etc.
- Advise on level of insurance required by self-management bodies
- Supply TUPE information if these regulations apply to any staff to be taken on by the Alliance

9.3.4 Site Improvement and Maintenance

- Process applications from Alliance for capital funding to support site improvement projects
- Provide technical advice on tree safety, invasive species, flooding and hazardous waste, as requested by Allotments Alliance

10. Financial Projections

See Appendix 1 for our 2021 financial statement.

See Appendix 2 for our provisional financial forecasts for 2022, 2023 and 2024.

10.1 Assumptions

The financial assumptions are that occupancy will increase slightly for 2022. The price per square metre was raised by 2% for 2022 with a suggestion of future increases up to 5%, only if necessary. The clearing of unlettable plots will continue.

10.2 Start-up Capital Requirements

The Alliance received £15,000 from RMBC in 2020 which was the proportion of rents collected for the first 3 months of 2020.

10.3 Investment Sources

The Alliance has investigated revenue streams from funding and is eligible to apply for Ward funds and other providers. This information has been provided by South Yorkshire Funding Advice Bureau.

10.4 Break-Even Forecast

See Appendix 1 and 2.

10.5 Specific Financial Indicators

Occupancy levels.

% of rents received.

10.6 Contingency Arrangements

The Alliance-allocated a £10,000 contingency allowance.

11. Risk Analysis

11.1 SWOT Analysis

Strengths	Weaknesses
Proven track record of successful site self- management in Rotherham	Information passed on from authority is inaccurate or omitted completely
Political support for new management model	Limited capacity / understanding of self- management on directly managed sites
Existing administrative systems transferred to new management operation easily	Poor condition of some sites due to neglect, particularly directly-managed sites
Council willingness to support the transition to new model	Pandemic has hindered progress on improvement works
Website and Facebook page are operational	Quality of currently provided groundworks service has been substandard
Capability and organizational skills of Allotment Support Assistant	Day-to-day operation in the long-term absence of the ASA
Dedicated input from directors	Restrictive lease agreement from RMBC
Opportunities	Threats
Charitable CBS well-placed to seek external funding and tax benefits	Possible difficulty recruiting and retaining volunteers as Directors
Scope to seek more cost-effective operational solutions	Lack of necessary expertise amongst volunteers
Volunteer resource and enthusiasm amongst allotment plot-holders	Inability to form Allotment Societies for individual sites
Pandemic has encouraged interest in allotments to increase	Refusal of existing Allotment Societies to participate in the Alliance model
Utilize other social media outlets to promote the allotments and allotment gardening	Poor performance by new body
Adopt alternative/modern vision – i.e. market as 'Urban Gardening' to attract younger / different socio-economic group participants	Insufficient funds/insolvency
	Improper conduct by Directors etc

11.2 Risk Mitigation

Weaknesses and threats	Action to take
Limited capacity/ understanding of self- management on directly managed sites, leading to inability to form site societies	Alliance to manage sites where a society does not exist. Alliance supports and builds capacity where needed to form new society. Possible formation of multi-site societies where individual sites are too small to sustain them.
Lack of necessary expertise amongst volunteers	Professional advice on legal and other specialist matters is available to members of the National Allotment Society and from bodies such as Cooperatives UK. Training of selected volunteers and any staff employed by the Allotments Alliance is advisable, as this will equip them to provide support to, and mentor other volunteers across all sites as needed.
Poor condition of some directly-managed sites and insufficient funds to address liabilities	It is expected that the Alliance and site societies will be in a strong position to develop successful bids for grant funding. Not only are they able to

	access funding not available to the Council, but
	the energy and enthusiasm of volunteers with
	good local knowledge will also be invaluable in
	making the case for funding. The Council made
	£100k capital available to the Alliance, and this
	was used as match funding for external funding
	bids.
Possible difficulty recruiting and retaining	Ensure support is available where necessary to
volunteers as Directors	help inspire potential volunteers, to promote
	volunteering opportunities, to deal with any
	problems that may occur, and to build volunteer
	leadership skills. Support may be sought from
	organisations such as Voluntary Action
	Rotherham, and the National Allotment Society.
Refusal of existing Allotment Societies to	The Council would explain that it will no longer
participate in the Alliance model	lease sites directly to Societies. Thus, collected by
	all Societies would be passed on to the Allotments
	Alliance to allow it to operate. Societies and their
	members would be able influence how the
	Alliance spends its budget. Should a Society be
	unwilling to work in this way, then its lease on the
	site would be terminated and the Alliance would
	control the site directly, pending formation of a
	new society if possible.
Poor performance by new body	By agreeing a set of performance indicators and
	putting in place a monitoring system, the
	Allotments Alliance would be able to identify any
	Societies that appear to have difficulty maintaining
	standards, and provide support necessary.
	Ultimately, the Alliance could terminate a Society's
	lease and take over control of the site if all else
	fails. The Alliance would also need to monitor and
	report its own performance and take action if this
The second secon	falls below standards agreed by its membership.
Improper conduct by people within self-	A comprehensive code of conduct must be in
management bodies	place for volunteers and staff working within the
	Allotments Alliance, and the Alliance must put in
	place effective measures for monitoring and
	enforcing this, including a whistle-blowing policy.
	Independent auditing of accounts will help to
	identify any irregularities.
Financial insolvency	Proper accounting and cost-control measures will
	reduce the risk of running out of money. Over time, it is recommended that the Alliance builds up
	reserves that can be drawn upon in times of need.
Long-term ASA absence	Holiday / sickness absence will be covered by
Long-term AoA absence	specific Directors taking responsibility for
	individual duties.
	Email –
	Collection of post from PO box – Talanta and
	Telephone —
	 Plot allocations on directly managed sites-
	Financial issues raising orders and paying
	invoices.

11.3 Contingency Plans and Exit Strategy

What could possibly go wrong?	What would we do if it did?
The Alliance looks to wind itself up due to failure to manage any of the above risks	The Council will be represented on the board of the Alliance, and will do all it can to help avert this. In the event that it is unable to, then the Council will have to resume control of allotments in accordance with its statutory duties under the Allotments Acts.

12. Summary

Following a further difficult 12 months in operation, the Alliance is in a well-placed position to ensure its continued success. With strategic use of the revenue from rents, applied skills and knowledge from Board members and advice from governing bodies, the Alliance will be able to offer continued improvement of the allotment provision in the Rotherham borough.

The main activities will be to ensure that any previous issues that have occurred on sites, i.e. plots being deemed unlettable for various reasons, will be resolved, with health and safety being of the utmost priority. The creation and development of good working relationships with both society committees and tenants on direct-managed sites will be a valuable tool as the Alliance strives to achieve its goals. The role provided by the Allotment Support Assistant will ensure that all current and future tenants will have a point of contact plus promotion of the Alliance can take place.

Financially, the Alliance will be able to control expenditure, seek out cost-effective ways in which to provide maintenance and improvement for all sites and ultimately operate sustainably to continue the allotment provision for future generations.
